

FOLUB & SAMUEL LABS

Company & Product Brief

Who we are, what we have built, where each product stands, and what we are looking for from a marketing partner.

LAGOS, NIGERIA · RC **9637480** · **FSLABS.TECH**
VERSION 1.0 · INTERNAL · 3 AUGUST 2026

About the company

Folub and Samuel Labs, known as FSLabs, is a technology and cybersecurity company incorporated in Nigeria (RC 9637480) and based in Lagos.

We do three things. We deliver technology services to clients across software development, cybersecurity, IT consulting, tech outsourcing, cloud and data. We build and operate our own products, which is what this brief is mainly about. And we train engineers through FSLabs Academy.

We are a company of two founders, and both work directly on every project. Adeseko Samuel leads technical and security work. Akinbayo leads business, strategy and partnerships.

Where we are, honestly

Worth stating up front, because it changes what a marketing plan should look like and we would rather you plan against the real position than a flattering one.

We are early. The products below were designed, built and are operated by us. Three of them work today. What we do not have yet is meaningful user volume or a marketing function, which is precisely why we are having this conversation. Assume you are planning a launch and an early growth phase, not optimising a mature funnel.

The products

TailorNow

tailornow.shop · live · consumer marketplace · Nigeria

A marketplace for custom fashion. It connects customers with verified tailors and fashion creatives and runs the whole order end to end: browsing portfolios and a style feed, booking, saved measurements, agreed pricing, payment with automatic split settlement to the creative, production tracking, fabric pickup and delivery, and mutual ratings. It also supports group and aso ebi orders and corporate uniforms.

- **Who it is for.** Two sides. Customers who want clothes made rather than bought, and tailors and fashion creatives who want steady orders and to get paid reliably.
- **Business model.** 20% platform commission on the order, plus a 3% service charge.
- **The marketing problem.** A two sided marketplace, so supply and demand have to grow together. Creatives are the harder and more valuable side to acquire, and most of them are

currently cash based and offline.

- **This is our most marketable asset.** Visual category, young audience, strong social potential, and a launch story about formalising informal craft businesses.

FSLabs Exchange

live · consumer fintech · Nigeria

Crypto to naira and account services. USDT, gift cards and related requests, processed within about 30 minutes.

- **Who it is for.** People converting crypto and gift card value to naira who care about speed and trust.
- **The marketing problem.** A trust category with heavy competition and real advertising restrictions on most major platforms. Any plan here needs to be channel realistic.

HR and Payroll platform

in final review · B2B SaaS · Nigerian businesses

Multitenant software for employees, departments, attendance, leave, documents, payroll records, audit logging and subscription billing.

- **Who it is for.** Nigerian businesses of roughly twenty to two hundred staff moving off spreadsheets and WhatsApp.
- **Business model.** Subscription.
- **Status.** Built and working, currently in a review and debug pass before we put it in front of paying businesses. Treat it as launching soon rather than available now.
- **The marketing problem.** Longer sales cycle, decision maker is a founder or an HR lead, and the competition is inertia rather than another product.

UrbanPulse

in development · civic and public sector

AI assisted citizen reporting and transport intelligence for African cities.

- **Who it is for.** City residents, and the transport authorities, government agencies and development funders who need the data.
- **Status.** In active development, not open to users. Included here for context on where the company is going. We would want a mutual NDA in place before going into detail on this one.

What we are looking for

We have not decided the scope yet, which is what we would like your input on. The questions we are trying to answer:

1. Which of these products deserves marketing spend first, and why.
2. What a realistic launch plan looks like for a two sided marketplace in Nigeria, given a small budget and no existing audience.
3. Whether the right first move is paid acquisition, creator and community work, content, or something else entirely.
4. What you would need from us to make that work, in time, assets and money.

Tell us what you think we are getting wrong. We would rather hear that now than after a campaign.

Brand

Name. FSLabs, one word. The full legal name is Folub and Samuel Labs.

Tagline. *Your Vision. Our Execution.* This does not get rewritten or made into variants.

Logo. Gold interlocking FS monogram above the FSLABS wordmark, with FS in gold and LABS in black. Supplied separately in full resolution, with a transparent version for use on colour.

Palette.

COLOUR	HEX	USE
Gold	#C9A84C	Primary accent
Gold bright	#F0C040	Highlights and gradients
Gold deep	#8B6914	Gold text on light backgrounds
Near black	#050505	Primary ground
Bone	#F5F0E8	Text on dark

How we sound. Direct, specific and calm. We name real things rather than describing benefits in the abstract, we use active voice, and we do not claim more than we can back. Please match that. Copy that oversells will read as untrue next to the rest of our material.

Note that TailorNow carries its own consumer brand and is not styled as FSLabs. Any work on it should treat it as its own identity.
