

OLATUJA OYINKANSOLA

CLOUD ENGINEERING · AUTOMATION · IT SUPPORT

Akure, Ondo State · 0901 230 9371 · olatujaoyinkansola@gmail.com

PROFILE

Biochemistry graduate working in cloud engineering, with the habits a laboratory teaches: follow the procedure, record what you did, and check the result before you trust it. I moved into technology deliberately and have built the skills on my own time, most recently a cloud engineering simulation covering version control and automated workflows. I am comfortable in Git and GitHub Actions, and I would rather ask early than guess and cause a problem.

TECHNICAL SKILLS

CLOUD AND DEVOPS

Cloud computing fundamentals, Git and GitHub, GitHub Actions, workflow automation, continuous integration concepts

DOCUMENTATION AND ANALYSIS

Technical documentation, record keeping, quality control procedures, internet research, data entry accuracy

PRODUCTIVITY TOOLS

Microsoft Word, Excel, PowerPoint; Google Docs, Sheets, Drive

STRENGTHS

Attention to detail, problem solving, critical thinking, clear communication, teamwork, adaptability, time management

CLOUD ENGINEERING EXPERIENCE

Introduction to Cloud Job Simulation (DevOps Engineer)

July 2026

Datacom, delivered through Forage

- Worked through a simulation built around the DevOps Engineer role at Datacom, taking the tasks as the role would receive them.
- Registered and configured a cloud application for a client brief, from an empty environment to a running deployment.
- Created a GitHub Actions workflow to automate build and deployment steps, triggered on repository events, applying version control discipline throughout.

PROFESSIONAL EXPERIENCE

Laboratory Technician

2024 to 2025

Miracle Hospital Laboratory, Oke Odu, Akure

- Ran routine diagnostic tests on blood, urine, and other clinical specimens, to fixed protocols where an error carries a real cost to a patient.
- Collected, labelled, and processed samples under standard procedure, maintaining an unbroken chain of identification from patient to result.
- Operated, calibrated, and maintained laboratory instruments so results stayed accurate and repeatable, and carried out quality control to safety standards without exception.
- Documented findings precisely and handled patient information in strict confidence, working alongside clinicians who needed plain answers to make decisions.

EDUCATION

Bachelor of Science (B.Sc.), Biochemistry

2025

Achievers University, Owo, Ondo State
